Introduction

DEV TEAM

01 Dennis Collins
Thumbi

02 Aquinas Opata

03 Ted Mburu

04 Matthew Wahome

introduction

construction is an art and a science; welcome to building!

PROBLEM STATEMENT

with covid -19 slowing down construction, our website aims to bridge the gap of material finding and tools, including marketing of products and distribution.

AIM

we aim to be a top notch e-commerce website that connect buyers and sellers of building materials.

Our Group's Goals

Key areas we're working on to ensure consistent humbakha web development

Making construction easier

We recognize that there has been a boom in construction industry and real-estate. Our main aim is to bridge the gap between the realtors and the construction material industry which is still under-developed in Kenya. By creating this construction website which will major on procuring materials.

Widen our network

We aim to bring on business people who have these materials and put them up on our website, so as to connect the trader and the buyer and make this platform available to as many users as possible.

5-step Plan

WE ARE HERE

01

Launch

Launch web to the public

02

Review

Study progress and make adjustments as needed

03

Build

Use the latest web dev technology update
html,css,javascript.

04

Deal

Close deals with main investors

05

Talk

Meet with investors and in-house construction companies

Checklist of tasks per team

- ☒ Schedule meetings
- ☒ Review current upgrade plans
- ☐ Draft contracts and permits
- ☐ Meet with web dev teams
- ☐ Update the CEO

What's Next

CHALLENGES IN DEV

We experienced challenges trying to make our online map record stores you visited and store them for you so you can remember them later.

SOLUTIONS

We employed skilled individuals and added our knowledge on APIs and map making using js.

FUTURE IMPLEMENTATIONS

we hope to go android and ios with this site
